

# HO Scale Pumpkin Crates

## Instructions:

In order to build these crates you'll need some scale strip wood. For this I'm using Midwest Products Scale Lumber:

- 2x4 – Part #8002. These are used for the side slats as well as the upright supports on the inside of the crate.
- 2x3 – Part #8001. These planks make the base of the crate.
- 4x4 – Part #8016. These make the small feet that raise the crate off the ground.

Simply use the templates above as a guide to placing the strip wood.
